

## Customer/user journey map

Team ID	PNT2022TMID17071
Project Name	Project – Signs with smart connectivity for better road safety.

### Template:

### User journey

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, and the stakeholders in your project. The information you add here should be representative of the observations and research you've done about your users.

Phases	The users must have the conscious about the traffic signs.			The NFC tag would be compulsorily placed in all vehicles.			Use Heart beat sensor to detect the driver status.			To reduce the accidents it is important to manage the vehicles properly.		
Steps	The drivers must have the driving license.	Knowledge of traffic rules and regulations.	Develop the right attitude about driving.	Identify and tracking using radio waves.	Install speed governor device.	Use NFC tags to communicate with active NFC devices.	Use ultrasonic sensor to detect the object distance.	Using LCD display, Traffic congestion are displayed.	GPS sensors placed in the vehicles.	Drivers should maintain the vehicles in proper condition.	To maintain oil and coolant levels.	Warning light that reminds drivers that their vehicle needs a service.
Feelings	NFC technology brings more benefits.	To avoid accidents and keep the passengers safe.	This technology improves road conditions in pit area.	To provide more efficient travel.	More strategic traffic management.	To provide Accident free techniques.	Less risk of damage.	This technique provides flexible service.	Prevent accidents and injuries	Provide better traffic signs.	Speed limits are detected early.	Cheapest and most profitable.
Pain points	Main cause of accidents and crashes are due to human errors.	There will be occur violation charges.	Vehicle damage leads to financial problems.	Huge economic losses because of slow transportation.	Traffic congestions ,which make lost a lot of time	Emotional injuries and medical costs.	There can be traffic delays and breakdowns.	Toll charges are high.	Risk of goods being damaged, especially over long distances.	Speeding remains a leading cause of accidents.	Major causes of environmental factor and mechanical factor.	Crowded at rush hours.
Opportunities	Fatalities occurring has attained its peak with more death rates.	The volume of traffic and passengers are very large.	Direct consequences of accidents like injury and property damage.	Roads are inadequate and bad.	Due to poor lighting there will be occur accidents.	Due to wrong indication of traffic signs.	Many check points will be irritate for drivers.	Bad weather conditions affects the driving.	Road signs are ignored because of their mentality.	Increase traffic can increase carbon emissions.	Severity of air pollution.	Lack of coordination
